Dr. Eda Akün

Born in Kayseri in 1977. She studied five years in Ankara University Dentistry Faculty and finished her university education in 2001. 1 year later she started her PhD in Prosthodonty department at the same university.

During her 6 years of PhD education she has attended many seminars abroad including USA, UK and many other European countries.

After finishing her PhD education in 2008 she has started to specialize in esthetic dentistry and joined our team in 2008.

In our clinic she only works on esthetic dentistry.

Dr. Toygan BORA

He was born in 1982 in Northern Cyprus . He studied five years in Yeditepe University Dentistry Faculty and finished his university education in 2006.

In the same year he started his PhD in Endodontic department at the same university. During his 4 years of PhD education he has attended many seminars abroad including USA, UK and worked as a part-time Endodontic dentist in clinics in Istanbul.

In our clinic he only works on endodontic dentistry.

WHY US?

- Professional Phd Level Dentists
- Advanced Technology
- Multidisciplinary Dentistry Approach
- Distinguished Service Facilities

Istanbul Implantology is run by a team of professional dentists who have all PhD degrees in three different areas of dentistry that is maxillofacial surgery, prosthodonty and endodontics . This lead us to serve our patients in a way which we call multidisciplinary dentistry approach.

Each dentist in the team follows all the latest literature and the technology in the world and we are proud of being not only one of the top clinics in Turkey but also in the world.

Sinus lifting, graft usage in implants, laminate veneers are only a few of the top treatments that we can apply in our clinic.

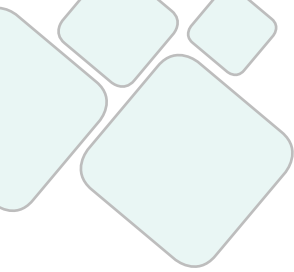

In our clinic artistry meets with science to provide a unique blend of caring.

TREATMENTS IN OUR CLINIC

- Dental Implant Treatments
- Advanced Aesthetic Dentistry Applications
- Aesthetic Plastic Periodontal Surgery
- Third Molar Surgery
- Sinus Lifting
- Oral facial Pain & Temporomandibular Joint
- All General Dental Applications
- Oral Diagnosis and Radiology

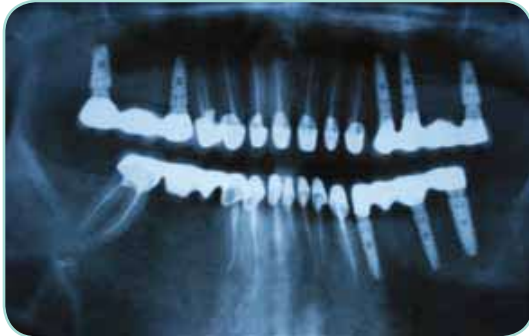

BEFORE & AFTER

Full Mouth Restoration

Our patient had lost all of his teeth in the back part of the mouth and had severe esthetic problems in the front area. After replacing implants to the back part of the mouth we have applied zirconium porcelains to the front part and our patients has a hollywood style smile now.

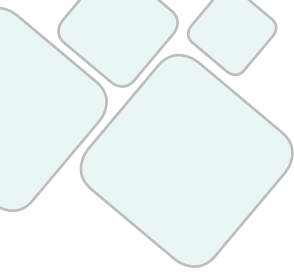

BEFORE & AFTER

Full Mouth Implant and Esthetic Restoration

All teeth of our patient had severe problems and he was about to lose all of them in the following one or two years. We have extracted all teeth and replaced 7 implants per up and low part of the mouth and after a one and half month healing period we have replaced the fixed porcelain prosthetics. During the healing period our patient was able to continue his normal life through the temporary prosthesis that we had applied.

Total treatment period was only three and half months!

BEFORE & AFTER

Full Mouth Implant and Esthetic Restoration

Our patient had lost all of her teeth a long time ago and was using unfixed crowns. She applied us for using a fixed prosthesis as she was hating to clean her crowns every evening and she was missing to eat an apple. We have applied 6 implants per up and low mouth and she is able to eat whatever she wants!

Total treatment period was only three months!

BEFORE & AFTER

Full Mouth Implant and Esthetic Restoration

Our patient had severe problems in her teeth. After replacing 6 implants fixed prosthesis has been applied and she has a very beautiful smile now!

Total treatment period was only three and a half months!

BEFORE & AFTER

Full Mouth Implant and Esthetic Restoration

All teeth of our patient had severe problems years. We have extracted all teeth and replaced 7 implants per up and low part of the mouth and after a one and half month healing period we have replaced the fixed porcelain prosthetics. During the healing period our patient was able to continue his normal life through the temporary prosthesis that we had applied.

Total treatment period was only four months!

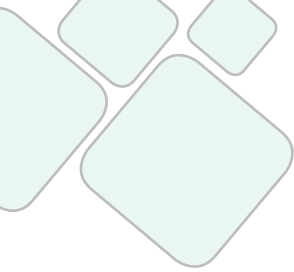

BEFORE & AFTER

Front Part Esthetic Implant and Zirconium

On the back of a trauma our patient had lost his up front teeth. We have applied one implant together with a zirconium porcelain.

Front Part Esthetic Implant and Zirconium

On the back of a trauma our patient had lost his up front teeth. We have applied one implant together with a zirconium porcelain.

BEFORE & AFTER

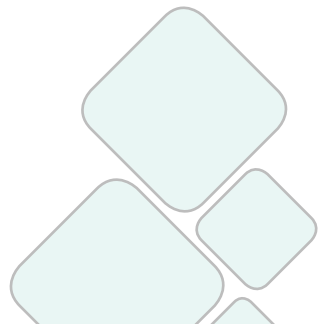

BEFORE & AFTER

Esthetic Compoist Laminate Veneer

Our patient has now a hollywood stile smile after application of teeth whitening and four composite laminate veneers to fill the gaps between her teeth life through the temporary prosthethis that we had applied.

Total treatment period was only four months!

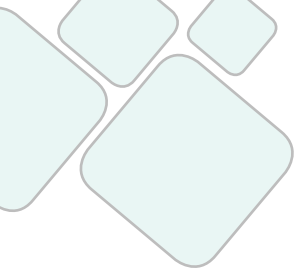

BEFORE & AFTER

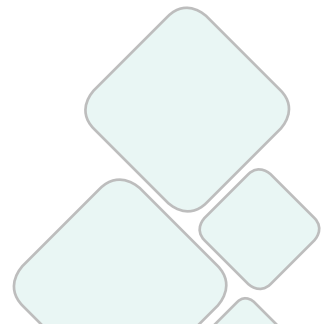

Esthetic Zirconium Porcelain

Our patient was using bridge crowns and was not happy of the colour of her teeth. We have replaced all of her teeth with zirconium porcelains and she can smile now in confidence.

BEFORE & AFTER

BEFORE & AFTER

Esthetic Compoist Laminate Veneer

Our patient has now a hollywood stile smile after application of teeth whitening and four composit laminate veneers to fill the gaps between her teeth. During the treatment none of the teeth got a single damage.

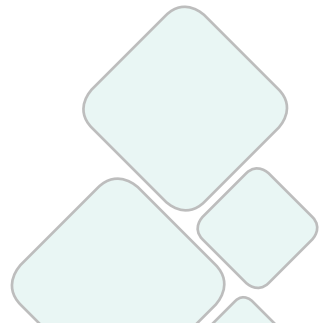

BEFORE & AFTER

Esthetic Composite Laminate Veneer

Front part teeth of our patient was short when compared the others and she was now happy from them. Through composite laminates we managed to fixed the short teeth inline with others.

BEFORE & AFTER

Esthetic Composite Laminate

Front part teeth of our patient was short when compared the others and she was now happy from them. Through composite laminates we managed to fixed the short teeth in line with others.
